

AN ENVIRONMENTAL POLICY ADOPTED BY THE SELECT VESTRY

The Rector, Select Vestry and Parishioners of the Parish of Kilbride recognise that concern for all components of the environment is a fundamental responsibility of all.

We are dedicated to carrying out all our functions and activities in a way which minimises negative impacts on the environment.

We are committed to ensuring that all activities undertaken on parish premises or on behalf of the parish will be in strict compliance with legislation.

It is an objective of the parish to co-operate with all statutory, voluntary and community bodies in our attempt to reduce our impacts on the environment.

In keeping with this policy we will:

- Monitor and improve energy use
- Monitor water use and reduce wastage
- Set targets for reduced waste generation
- Promote recycling within the parish
- Minimise the risk of water, land and air pollution
- Include environmental considerations in Select Vestry business decisions
- Update staff, parishioners and contractors on policy
- Generally apply sustainability objectives in all activities
- Attempt to continually improve our environmental performance

The Parish Environmental Policy will be made widely available to parishioners and others through the Herald, the parish website and other means as appropriate.

Ivan Topping, *Hon. Sec.*

W.D. Humphries, *Rector*
